Automation Selection Criteria

The following tables discuss the functional check/test cases that were selected for automation as well as the criteria for their selection:

Demo Page

Following functional checks/test cases were selected for automation for the Demo Page:

Feature	Functional Check/Test Case	Selection Criteria
View Demo Videos	Clicking 'Watch Videos' button should navigate user to the Demo Videos page	**Business Value:** This test case tests part of an important requirement where users should be able to view Demo Videos to better understand Xeneta's platform. Failure of this test case could result in the loss of leads and potential new clients. This should be added as part of an **automated smoke suite** for the site.
Schedule a Demo	Submitting the form with valid data should display a popup with the message: • 'Thank you for your interest in Xeneta! Please check your inbox and set your date and time on the calendar. Happy shipping!	**Business Value:** This test case tests part of a crucial requirement where users should be able to schedule a demo with Xeneta team to better understand how their platform can help us. Failure of this test case could result in the loss of leads and potential new clients. This should be added as part of an **automated smoke suite** for the site
	Clicking on 'Privacy Policy' link should navigate user to the privacy policy page	**Legal Ramifications:** User should be able to view the privacy policy of a company that takes PI information. Failure can result in legal action against the company by authorities resulting in financial loss
	'I agree to Privacy Policy from Xeneta.' checkbox should: • Be required to be checked	**Legal Ramifications:** If the company takes user's PI information without their consent, they could face legal action and financial loss
Sign up for Webinar	Submitting the form with valid data should: • Navigate user to a page with the title: 'Thanks for signing up for the Live Group Demo!'	**Business Value:** This test case tests part of a crucial requirement where users should be able to sign up for a live webinar with Xeneta team to ask questions and better understand how their platform can help them. Failure of this test case could result in the loss of leads and potential new clients. This should be added as part of an **automated smoke suite** for the site

	Clicking on 'Privacy Policy' link should navigate user to the privacy policy page	**Legal Ramifications:** User should be able to view the privacy policy of a company that takes PI information. Failure can result in legal action against the company by authorities resulting in financial loss
	'I agree to Privacy Policy from Xeneta.' checkbox should: Be required to be checked	**Legal Ramifications:** If the company takes user's PI information without their consent, they could face legal action and financial loss

Careers Page

Following functional checks/test cases were selected for automation for the Demo Page:

Feature	Functional Check/Test Case	Selection Criteria
Apply for Job	Clicking on a job title should show details about: • Xeneta • Job Responsibilities • Company Benefits • Application Instructions • Application Link	**Business Value, Core Requirement of the Page:** As a startup, the company will require top talent to improve and maintain their platform resulting in company's growth. As such it is vital candidates are able to view job details on this page and apply for them. This is the most important feature on this page.
	Clicking on the 'Apply' link should navigate the user to the job application link in a new tab
